FENCE POSTS BY TREX. THE ULTIMATE UNIVERSAL FENCE POST.

Your fence is only as strong as your posts. Choosing the right material will make the difference between enjoying years of virtually no maintenance or wasting weekends with the headaches of fence repair and replacement.

Choosing a Trex fence post either for a Trex Fencing system or as an upgrade for wood and ornamental fencing is a smart choice.

BENEFITS OF A TREX FENCE POST

Wood posts won't last; they split and rot. Vinyl posts are thin and have the unnatural appearance of plastic. With Trex, you get the best of both worlds.

The versatility and durability of a Trex fence post is unmatched. With a 25-year warranty from the leading brand in outdoor building, you can be assured that your fence posts were manufactured to last a generation or more.

Trex Fence Posts WILL ...

- ✓ work with all types of fencing applications
- ✓ mount on top of walls or attach to them
- ✓ be compatible with virtually any fence product
- ✓ perform exceptionally well in high winds
- ✓ look natural in 4 rich colors
- ✓ enable installation of fences up to 12' tall
- ✓ protect the environment with 95% recycled content

Trex Fence Posts WON'T ...

- ✗ rot or decay
- ✗ warp, twist, or split
- ✗ get damaged or eaten by insects
- ✗ become brittle, crack, or break in extreme temperatures
- ✗ need wood or steel reinforcements (except for gate hinge posts)

UNIVERSAL POST

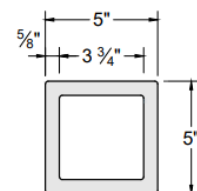

"Blank" posts can be used interchangeably for multiple applications

HOLLOW

Standalone posts also can be used as sleeves if applicable.

THICK POST WALL

Strong enough to resist extreme elements

Dimensions are nominal

LENGTHS 7', 8', 9', and 12'

3 POST CAPS

Pyramid, Flat Top, Crown

4 NATURAL COLORS

Colors weather naturally to lighter tints over a season of exposure to the elements

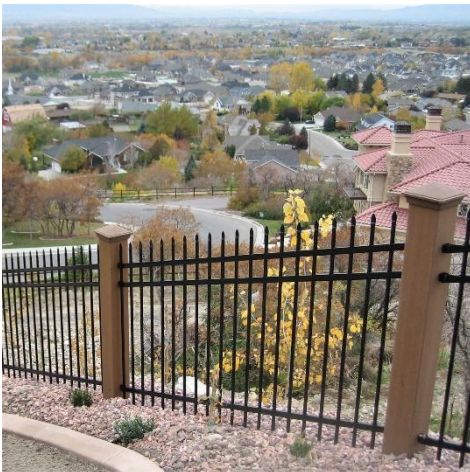

TREX COMPOSITE FENCE POSTS, NOT JUST FOR TREX FENCING

Many homeowners choose Trex posts to support other fence materials. **Ornamental fences**, such as steel, wrought iron or aluminum, look particularly striking when combined with Trex. The 5" post profile gives the fence a more substantial look while the post color adds a beautiful contrast to the metal material.

Trex posts are excellent alternatives to metal and wood because they won't rust or rot. Consider upgrading from a **wood fence post** to Trex. While your wood fence will degrade over time, with Trex posts, repair and replacement will be limited to just your wood rails and pickets.

If you plan to build a wood fence, upgrade your posts to Trex. You can also paint your posts to match!

Integrate Trex fence posts with your ornamental panels for a corrosion-free, sturdy, colorful alternative. Attach virtually any panel to Trex posts with third-party flat mount brackets and exterior screws.

... and consider other applications. Trex fence posts can be used for community signposts, sleeves for structural needs (such as deck screens, awnings, privacy railing), rafters for shade structures, and more!
